

Dolomite Powder

We are engaged in offering qualitative **Dolomite Powder**, which is chemically known as Calcium Magnesium Carbonate ($\text{CaCO}_3 \cdot \text{MgCO}_3$). Our this range of minerals is widely acclaimed for its reduced water absorption, even texture, reduces fissure development and pure white color.

Some of its properties are :

- High Purity- Stable, reproductive properties of end products
- Good Brightness - Neutral white tone, good hiding effect, consistent color of end product
- Low Moisture Absorption - Good molded surface, well suited for plastic paints
